

# Blended Learning Deployment Plan

## How to Get Started

There are many ways to implement blended learning into a school district, building, grade level, and/or classroom. There is not one right or wrong way to start the process. Below is a quick guide on how the DSD Professional Development Team recommends to implement Blended Learning. Our biggest suggestion is to start small and make sure to have a clear vision of what you want Blended Learning to look like in your learning environment.

**COMMENTS:** Year one will showcase Phase 1 and Phase 2. The focus will be work with the educators that are willing and able the most to ensure the process will work in your school setting. Provide them onsite/virtual coaching support. Don't leave out the reluctant educators. Keep talking with them and start to sway their thinking towards developing a Phase 1 lesson plan. During staff meeting make sure to showcase what is working and keep restating the vision of the blended learning program.
